## NEWS RELEASE

# New City Website and Email Address Launch

*The City of Frederick Announces New Website and Email Address Launch.*

**FREDERICK, MD** – November 21, 2019: Mayor Michael O'Connor announces the launch of the City's improved website and new .gov email domain. The updated cityoffrederickmd.gov will be visible to the public by the evening of November 21, 2019.

The improvements to the site will make it easier for the community and others to access services, find information, and engage with local government. Apart from the clean enhanced feel, the refreshed site features a new audience centric navigational structure and improved search capabilities. Other notable improvements include the ability to translate pages into multiple languages.

The refreshed look and prioritization of service-oriented functions such as online payments, employment opportunities, public meetings, and maps, make the new site easier to navigate and interact with. Another enhancement is the highlighting of popular content on the home page, allowing users to quickly access and navigate to those topics.

Along with the website domain name, employee email addresses have changed to username@cityoffrederickmd.gov. As we transition to the .gov email domain, City employees will continue to have uninterrupted delivery of all emails that are sent to the former @cityoffrederick.com address.
